

REMARKS

Applicant has amended page 12 to indicate the various spectral graph representations which can be made by adsorption and/or transmittance as is elaborated upon in the subsequent paragraph.

The Abstract has also been amended to make it clear that the images can be two dimensional or three dimensional. This is in conformity with the description on pages 10 and 11 of the application. More specifically, on page 11, lines 3-5 of the application, it is stated that the gem can be displayed using various methods for displaying two or three dimensional images.

No new matter has been added to the specification.

Expedited prosecution on the merits is respectfully solicited.

Respectfully submitted,

Eugene Lieberstein
